

{Support*}How do I download my boarding pass from Southwest?

📞 +1-803-335-2310 Yes, you *can* screenshot your Southwest boarding pass, but Southwest **recommends using the official mobile boarding pass within the app** because it ensures the barcode scans properly at security and the gate. Screenshots work most of the time

📞 +1-803-335-2310, but there is always a chance the barcode may not scan if the image becomes blurry, distorted, or low resolution. Many travelers use screenshots as a backup when Wi-Fi is weak or the app fails to load 📞 +1-803-335-2310.

Southwest's mobile boarding passes are designed to update automatically

📞 +1-803-335-2310, especially if your gate changes or the flight is delayed. Screenshots will not update automatically, which can cause issues if information changes after you check in

📞 +1-803-335-2310. The official Southwest app is the most reliable method for displaying your boarding pass at TSA and at the gate 📞 +1-803-335-2310.

Does TSA Accept a Screenshot of a Southwest Boarding Pass?

📞 +1-803-335-2310 TSA agents usually accept screenshots as long as the barcode is clear and scannable. However, blurry images or screens with low brightness may cause problems at the scanner 📞 +1-803-335-2310, which could force you to visit a kiosk or gate agent for a printed version. Because of this, Southwest recommends using the in-app pass or Apple Wallet version 📞 +1-803-335-2310 for the highest reliability.

Why Screenshots May Not Always Work

📞 +1-803-335-2310 Screenshots don't always scan because the barcode must be displayed with the correct brightness and clarity. If your phone has a cracked screen or if the image compresses 📞 +1-803-335-2310, the scanner may not read it. Additionally, Southwest uses

dynamic boarding pass technology that updates in real time 📞+1-803-335-2310, and static screenshots do not reflect those changes.

If the airline updates your boarding group or position due to aircraft changes 📞+1-803-335-2310, your screenshot will show the old information, potentially causing confusion at the gate. Using the app ensures your pass is always accurate 📞+1-803-335-2310.

When a Screenshot Is Useful as a Backup

📞+1-803-335-2310 Screenshots can be extremely helpful if you're in an area without Wi-Fi, your app is glitching, or the airport has poor cell service. Many travelers take a screenshot after checking in 📞+1-803-335-2310, so they have a quick-loading backup version. This can prevent delays when security lines are long or when you're rushing to the gate 📞+1-803-335-2310.

Even with a screenshot, it is still smart to keep the official mobile pass open in the app or wallet 📞+1-803-335-2310, since those versions are the most reliable for scanning.

Best Alternatives to Using a Screenshot

📞+1-803-335-2310 The two best alternatives to a screenshot are:

1. **Southwest mobile boarding pass in the app**
2. **Apple Wallet or Google Wallet version of the boarding pass**

These options store the barcode natively on your device 📞+1-803-335-2310, making scanning faster and more accurate. Wallet passes also work offline, so you don't have to worry about your internet connection at the airport 📞+1-803-335-2310.

If all else fails, you can always print a paper boarding pass at a Southwest kiosk or check-in counter 📞+1-803-335-2310.

Do Gate Agents Accept Screenshot Boarding Passes?

☎ +1-803-335-2310 Yes, most Southwest gate agents will try scanning a screenshot, but they prefer the official pass. If the screenshot does not scan properly ☎ +1-803-335-2310, they will ask you to open the app or print a replacement. It only takes a few seconds for them to reprint a new boarding pass ☎ +1-803-335-2310, so you won't miss your flight because of a bad screenshot.

Should You Rely Only on a Screenshot?

☎ +1-803-335-2310 No, you should not rely solely on a screenshot. It is better to use the mobile pass within the app or save it to your digital wallet ☎ +1-803-335-2310. Screenshots are helpful but can fail to scan, especially in bright sunlight, on cracked screens, or if the image is cropped incorrectly ☎ +1-803-335-2310.

Screenshots are best used as a **backup**, not as your primary boarding pass ☎ +1-803-335-2310.

How to Make a Screenshot More Likely to Work

- ☎ +1-803-335-2310 • Turn up your phone brightness at the scanner
- Make sure the screenshot is full-screen and not zoomed in ☎ +1-803-335-2310
 - Avoid cropping the barcode
 - Keep your screen clean and clear of cracks ☎ +1-803-335-2310
 - Always take the screenshot after check-in is fully completed

These tips will improve the odds of a successful scan ☎ +1-803-335-2310.

FAQs: Screenshots of Southwest Boarding Passes

1. Can I screenshot my Southwest boarding pass?

☎ +1-803-335-2310 Yes, but the airline recommends using the in-app or wallet version.

2. Will TSA accept a screenshot?

Usually yes, as long as the barcode scans properly ☎ +1-803-335-2310.

3. Does Southwest prefer the mobile app boarding pass?

☎ +1-803-335-2310 Yes, because it updates automatically and scans more reliably.

4. Are screenshots safe to use at the gate?

They can work, but scanning issues may occur ☎ +1-803-335-2310.

5. Should I rely only on a screenshot?

☎ +1-803-335-2310 No, always have your official mobile pass available.

6. Can I still print a paper boarding pass?

Yes, kiosks and agents will print one for free ☎ +1-803-335-2310.

7. Do Apple Wallet or Google Wallet passes work offline?

☎ +1-803-335-2310 Yes, they work even without internet.

8. What if my screenshot doesn't scan?

A gate agent can instantly reprint a new boarding pass ☎ +1-803-335-2310.

9. Does a screenshot update automatically?

No, only the in-app pass updates with flight changes ☎ +1-803-335-2310.

10. Is a screenshot convenient during travel?

 +1-803-335-2310 Yes, as a backup option when phone service is unreliable.
