

August, 2020

Dear Resident:

The Metropolitan St. Louis Sewer District (MSD) works to protect the public health and environment through effective wastewater and stormwater management. As part of MSD Project Clear, a long-term effort to reduce basement backups and sewer overflows, MSD is planning a construction project in your neighborhood: Brentwood Forest, Fair Oaks, Middlesex I/I Reduction (12100).

You're Invited to a Virtual Public Meeting

MSD Project Clear invites you to attend a virtual public meeting on September 16 to learn more about the Brentwood Forest (12100) project, meet the construction team, and let us answer any questions you may have. We look forward to a good discussion, and we wanted to provide some tips for navigating this virtual meeting.

First, you don't need to download anything or install an app or even have an internet connection to participate. You can log in from a desktop, handheld device, or even your landline phone.

The best way to participate in the meeting is through a desktop computer or tablet, as you'll be able to see our slides and presenters, type in questions during the meeting, and respond to poll questions in real-time. **Registration is required** to participate through a computer or tablet. To register, visit www.msdproujctclear.org/bfmeeting.

If dialing in by phone, call this number: 888-475-4499 and when prompted, enter the webinar ID: 981 8280 6876 and password: 216249. Unfortunately, the Zoom platform does not have local St. Louis dial in numbers. Participants using the dial in option will not be able to submit questions during the meeting, however, we invite you to send questions to us via the contact us page on our website at www.msdproujctclear.org/brentwoodforest.

We look forward to "seeing" you all on Wednesday, September 16!

A Clear Solution

MSD Project Clear engineers have designed a new project called Brentwood Forest, Fair Oaks, Middlesex I/I Reduction (12100). This project will help reduce basement backups and sewer overflows in your neighborhood. Additional information on the project can be found at www.msdproujctclear.org/brentwoodforest. We appreciate your cooperation as we work together to reduce basement backups and improve water quality!

Sincerely,

Mark Dietiker
MSD Project Manager, Engineering Department
