

FEBRUARY 2020

Dear Resident:

The Metropolitan St. Louis Sewer District (MSD) works to protect the public health and environment through effective wastewater and stormwater management. As part of MSD Project Clear, a long-term effort to reduce basement backups and sewer overflows, MSD is planning a construction project in your neighborhood: FF-07 Fee Fee Creek Sanitary Relief (10012).

You're Invited to a Virtual Public Meeting

MSD Project Clear invites you to attend a virtual public meeting on Wednesday, February 17 at 6:30PM to learn more about the project, meet the construction team, and let us answer any questions you may have. We look forward to a good discussion, and we wanted to provide some tips for navigating this virtual meeting.

First, you don't need to download anything or install an app or even have an internet connection to participate. You can log in from a desktop, handheld device, or even your landline phone.

The best way to participate in the meeting is through a desktop computer or tablet, as you'll be able to see our slides and presenters, type in questions during the meeting, and respond to poll questions in real time.

Registration is required to participate through a computer or tablet. To register, visit www.msdproujctclear.org/FF07Meeting.

If dialing in by phone, call this number: +1 301 715 8592 and when prompted, enter the **webinar ID: 991 7596 6422** and **password: 740013**. Participants using the dial in option will not be able to submit questions during the meeting, however, we invite you to send questions to us via the contact us page on our website at www.msdproujctclear.org/FF07.

We look forward to "seeing" you all February at 17th at 6:30 pm!

A Clear Solution

MSD Project Clear planners and engineers have designed a new project called FF-07 Fee Fee Creek Sanitary Relief (10012). This project will help reduce basement backups and promote cleaner local waterways.

Additional information on the project can be found by visiting www.msdproujctclear.org/FF07. We appreciate your cooperation as we work together to reduce basement backups and improve water quality in your neighborhood.

Sincerely,

Chuck McFarland
MSD Project Manager, Engineering Department
