

AUGUST 2020

Dear Resident:

The Metropolitan St. Louis Sewer District (MSD) works to protect the public health and environment through effective wastewater and stormwater management. As part of MSD Project Clear, a long-term effort to reduce basement backups and sewer overflows, MSD has engaged the services of Burns & McDonnell to design sewer improvements through a project planned in your neighborhood: Geyer Sanitary Relief and Windsor Springs P-521 Storage (Big Bend Blvd to Windsor Springs Dr) (12175)

You're Invited to a Virtual Public Meeting

MSD Project Clear invites you to attend a Zoom virtual public meeting on **September 1, 2020** from **6 PM – 7 PM** to learn more about the project, meet the Design team, and let us answer any questions you may have. We look forward to a good discussion, and we wanted to provide some tips for navigating this virtual meeting.

First, you don't need to download anything or install an app or even have an internet connection to participate. You can log in from a desktop, handheld device, or even your landline phone.

The best way to participate in the meeting is through a desktop computer or tablet, as you'll be able to see our slides and presenters and type in questions during the meeting.

Registration is required to participate through a computer or tablet. To register, visit msdprojectclear.org/GeyerMtg. Once you register, you will be sent the meeting link and further instructions on how to attend.

If dialing in by phone, call this number: +1 312 626 6799 and when prompted, enter the webinar ID: 950 1611 4050 and password: 655154. Participants using the dial in option will not be able to submit questions during the meeting, however, we invite you to send questions to us via our website at msdprojectclear.org/Geyer. We look forward to "seeing" you all on **September 1 at 6 pm!**

A Clear Solution

MSD Project Clear planners and engineers have designed a new project called Geyer Sanitary Relief and Windsor Springs P-521 Storage (Big Bend Blvd to Windsor Springs Dr) (12175). This project will help reduce basement backups and prevent sewer overflows by increasing the size of the existing pump station and sanitary force main.

Additional information on the project can be found by visiting msdprojectclear.org/Geyer. We appreciate your cooperation as we work together to improve water quality and reduce basement backups in your neighborhood.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Steve Roberts'.
