

Sub-Trunk #3 Sanitary Relief

(Muriel Dr to Jenner Ln)

MSD Project Number 11669

The purpose of this project is to alleviate basement backups and sewer overflows by increasing the capacity of the sewers in your area.

- Once work begins, you can expect:
- the presence of work crews, construction materials, and equipment;
 - excavations that provide access to the sewer system; and
 - temporary disruptions to traffic, driveway access, and on-street parking close to the job site.

As each phase of work is completed, the project area will be fully restored to pre-construction conditions.

This notification is provided as a courtesy to help MSD customers anticipate work in their neighborhood well in advance. You will receive a second notification closer to the project start.
