

February 3, 2022

Dear Resident:

The Metropolitan St. Louis Sewer District (MSD) works to protect the public health and environment through effective wastewater and stormwater management. As part of MSD Project Clear, a long-term effort to reduce basement backups and sewer overflows, MSD is planning a construction project in your neighborhood: **Lower Meramec Wastewater Treatment Facility Expansion Phase II 12255**.

You're Invited to a Virtual Public Meeting

MSD Project Clear invites you to attend a virtual public meeting on February 17 at 6:00 p.m. to learn more about the Lower Meramec Facility Expansion project, meet the design team, and let us answer any questions you may have. We look forward to a good discussion, and we wanted to provide some tips for navigating this virtual meeting.

First, you don't need to download anything, install an app, or even have an internet connection to participate. You can log in from a desktop, handheld device, or even your landline phone. The best way to participate in the meeting is through a desktop computer or tablet, as you'll be able to see our slides and presenters, type in questions during the meeting, and respond to poll questions in real time.

Registration is required to participate through a computer or tablet. To register, visit msdprojectclear.org/LowerMeramecMtg.

If dialing in by phone, call this number: (312)-626-6799 and when prompted, enter the **webinar ID: 885 4718 5776** and **passcode: 745050**. Unfortunately, the Zoom platform does not have local St. Louis dial in numbers. Participants using the dial in option will not be able to submit questions during the meeting, however, we invite you to send questions to us via the contact the project manager link on our project webpage at www.msdprojectclear.org/LowerMeramecFacility.

We look forward to "seeing" you all on February 17 at 6:00 p.m.

A Clear Solution

As part of our agreement with the Missouri Department of Natural Resources to improve water quality in the Meramec River basin, MSD Project Clear planners and engineers have designed improvements to the Lower Meramec Wastewater Treatment Facility. Additional information on the project can be found by visiting www.msdprojectclear.org/LowerMeramecFacility. We appreciate your cooperation as we work together to improve water quality in our region.

Sincerely,

Jerry Jung
MSD Project Manager, Engineering Department
