

February 2023

Dear Resident:

The Metropolitan St. Louis Sewer District (MSD) works to protect the public health and environment through effective wastewater and stormwater management. As part of our long-term effort to reduce basement backups and sewer overflows, MSD Project Clear is planning a construction project in your neighborhood: **Glenfield Sanitary Relief (12264)**.

### You're Invited to a Virtual Public Meeting

MSD Project Clear invites you to attend a virtual public meeting on Thursday, March 16, to learn more about the Glenfield Sanitary Relief (12264) project, meet the construction team, and let us answer any questions you may have. We look forward to a good discussion, and we wanted to provide some tips for navigating this virtual meeting.

First, you don't need to download anything or install an app or even have an internet connection to participate. You can log in from a desktop, handheld device, or even your landline phone.

The best way to participate in the meeting is through a desktop computer or tablet, as you'll be able to see our slides and presenters, type in questions during the meeting, and respond to poll questions in real time.

**Registration is required** to participate through a computer or tablet. To register, visit [www.msdproujctclear.org/glenfieldmtg](http://www.msdproujctclear.org/glenfieldmtg).

If dialing in by phone, call this number: 646-876-9923 and when prompted, enter the **webinar ID: 854 2665 2156** and **password: 633799**. Unfortunately, the Zoom platform does not have local St. Louis dial in numbers. Participants using the dial in option will not be able to submit questions during the meeting, however, we invite you to send questions to us via the contact us page on our website at [MSDProjectClear.org/Glenfield](http://MSDProjectClear.org/Glenfield). We look forward to "seeing" you all March 16 at 6:00 p.m.!

### A Clear Solution

MSD Project Clear planners and engineers have designed a new project called Glenfield Sanitary Relief (12264). This project will help reduce basement backups and alleviate sewer overflows.

Additional information on the project can be found by visiting [MSDProjectClear.org/Glenfield](http://MSDProjectClear.org/Glenfield). We appreciate your cooperation as we work together to reduce basement backups and improve water quality in your neighborhood.

Sincerely,

Tracy Sigmund  
MSD Project Manager, Engineering Department
