# Project Overview

- General Goal
  - Increase the capacity of the wastewater sewer in this area
- Project Scope
  - Construct approximately 4,400 feet of wastewater pipe
  - Increase pipe size to between 8-27"
- Benefits
  - Fewer basement backups

# Tentative Construction Schedule

- **Start:** Winter 2025
- **End:** Spring 2028

*Construction schedule is subject to change based on weather, utility conflicts, supply chain problems, and other unforeseen issues.*

# Previous Public Engagement

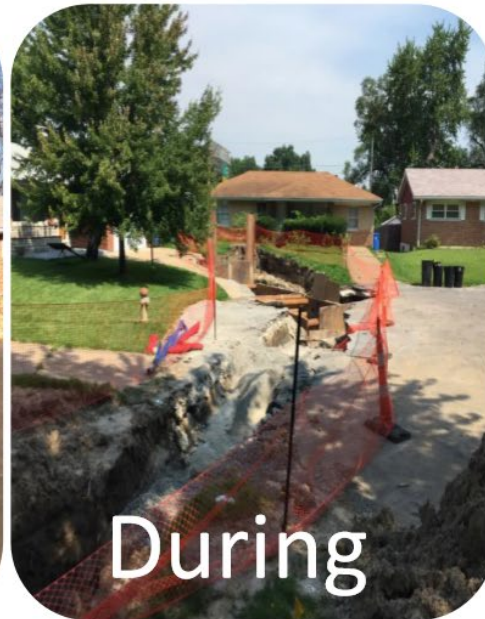

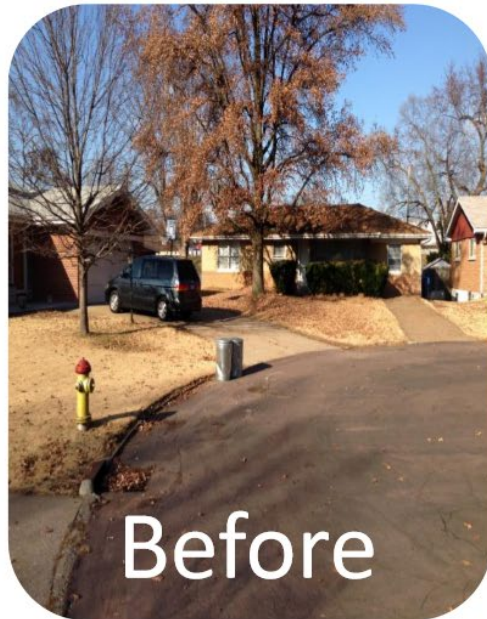

- June 2022 – Neighborhood Public Meeting

# What can residents expect?

- Trenches or “open-cut” excavation
- Tunneling
- Construction noise during normal business hours
- Traffic control plan and access issues
  - Lane and road closures will temporarily affect traffic
  - Temporary access restrictions to residential properties
  - Contractor will notify property owners before access restrictions

# How will it look when construction is finished?

- Trenches backfilled soon after pipe is installed
  - Roadway and sidewalk restoration
- Private property restoration per easement

# Frequently Asked Questions

- Will this work disrupt sewer or other utility services?
- Will trees be removed as part of this project?
- Will construction affect access to my driveway?
- Will emergency vehicles have access to my property during construction?
