Project Overview

- General Goal

- Reduce erosion and protect nearby properties and infrastructure along the creek/stream

- Project Scope

- Stabilize approximately 1,500 feet of streambank
 - Install approximately 300 feet of new storm sewer pipe
 - Install approximately 200 feet of wastewater pipe
 - Install approximately 350 feet of retaining wall

- Benefits

- Protect nearby buildings and public infrastructure from erosion
 - Improve stream health and water quality by reducing sediment

The Metropolitan St. Louis Sewer District
Port Diane to Tennant Bank Stabilization (11044)

Project Map

- Design completion: Winter 2025
- Easement acquisition completion: Winter 2026
- Estimated construction start: Summer 2027
- Estimated duration: 9-12 months

What can residents expect?

- Trenches or “open-cut” excavation
- Construction noise during normal business hours
- Traffic control plan and access issues
 - Lane and road closures will temporarily affect traffic
 - Temporary access restrictions to residential properties
 - Contractor will notify property owners before access restrictions

How will it look when construction is finished?

- Trenches backfilled soon after pipe is installed
 - Roadway and sidewalk restoration
- Private property restoration per easement

Frequently Asked Questions

- Will this work disrupt sewer or other utility services?
- Will trees be removed as part of this project?
- Will construction affect access to my driveway?
- Will emergency vehicles have access to my property during construction?
