Project Overview

■ General Goal

- Separate a combined sewer into two separate sewers, one for stormwater and one for wastewater in this area

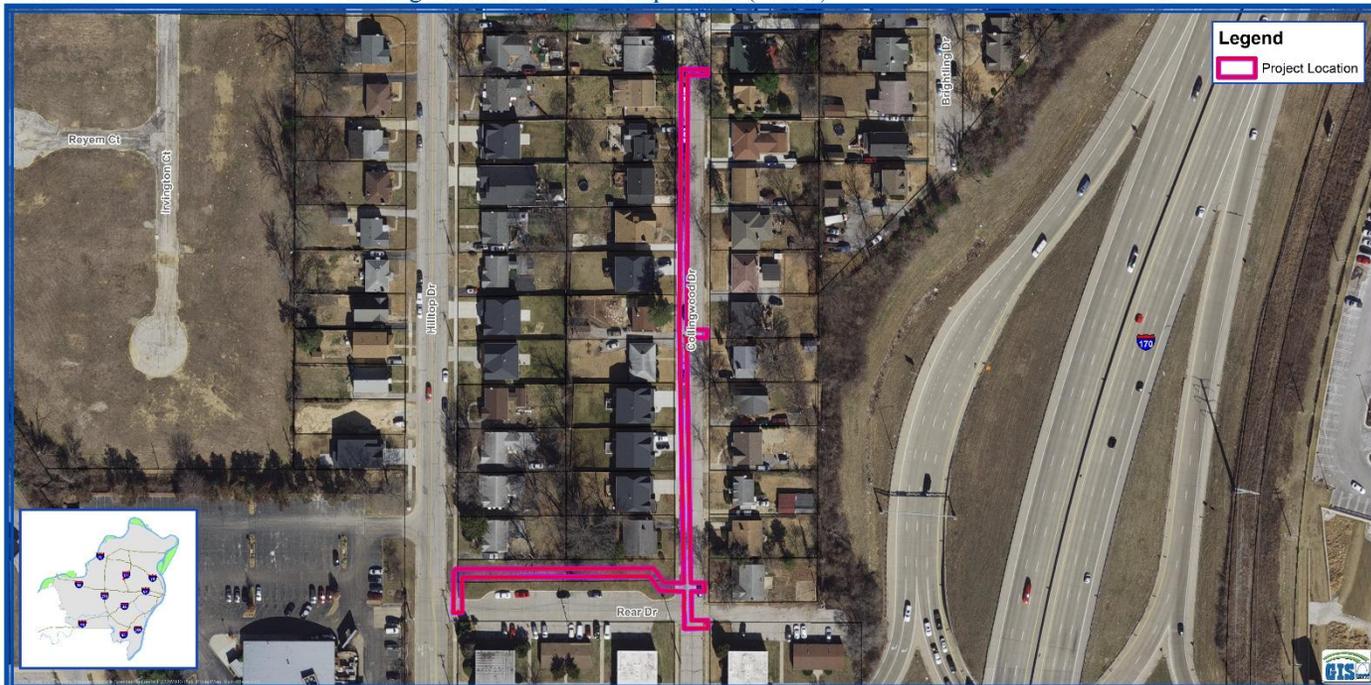

■ Project Scope

- Construct approximately 165 feet of wastewater pipe and 815 feet of stormwater pipe
- Replace approximately 165 feet of wastewater pipe
- Rehab approximately 885 feet of wastewater pipe
- Increase pipe size to between 8-15"

■ Benefits

- Fewer basement backups
- Eliminate 1 combined sewer overflow (CSO)

The Metropolitan St. Louis Sewer District
Collingwood Drive Sewer Separation (11727)

Project Map

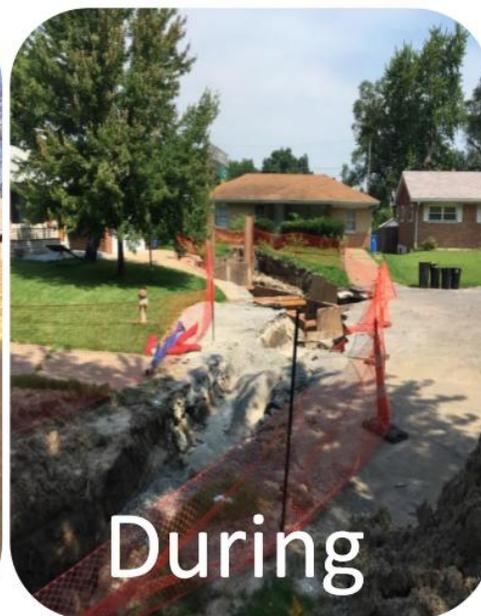

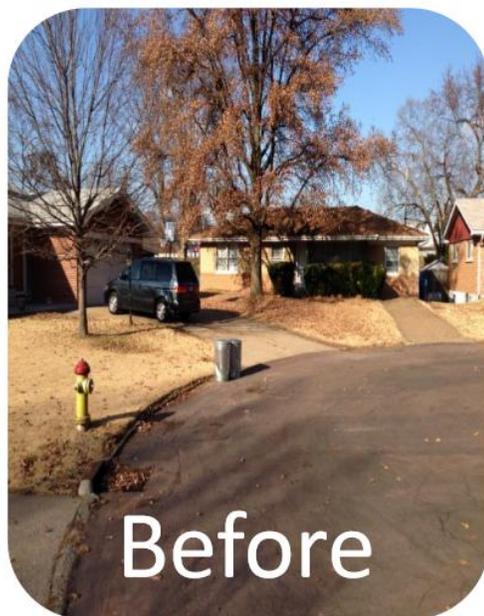

- Design completion: Spring 2026
- Easement acquisition completion: Spring 2027
- Estimated construction start: Fall 2027
- Estimated duration: 9-12 months

What can residents expect?

- Trenches or “open-cut” excavation
- Construction noise during normal business hours
- Traffic control plan and access issues
 - Lane and road closures will temporarily affect traffic
 - Temporary access restrictions to residential properties
 - Contractor will notify property owners before access restrictions

How will it look when construction is finished?

- Trenches backfilled soon after pipe is installed
 - Roadway and sidewalk restoration
- Private property restoration per easement

Frequently Asked Questions

- Will this work disrupt sewer or other utility services?
- Will trees be removed as part of this project?
- Will construction affect access to my driveway?
- Will emergency vehicles have access to my property during construction?
