Project Overview

■ General Goal

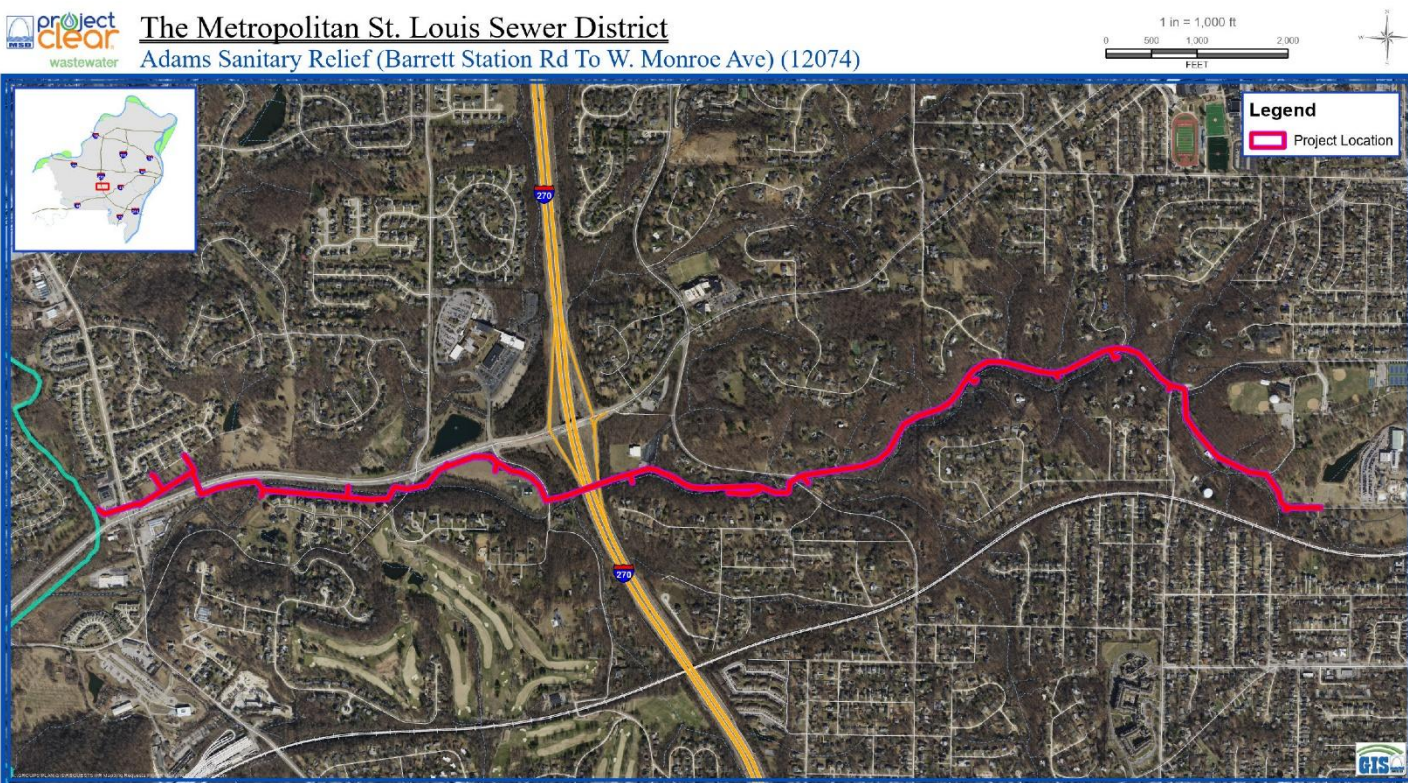

- Increase the capacity of the wastewater sewer in this area
- Reduce basement backups
- Reduce wastewater overflows

■ Project Scope

- Construct approximately 16,600 feet of wastewater pipe
- Increase pipe size
 - Current: 15-30"
 - New: 27-42"
- Abandonment and removal of existing wastewater pipe

■ Benefits

- Fewer basement backups
- Eliminate 5 sanitary sewer overflows (SSO)

Project Map

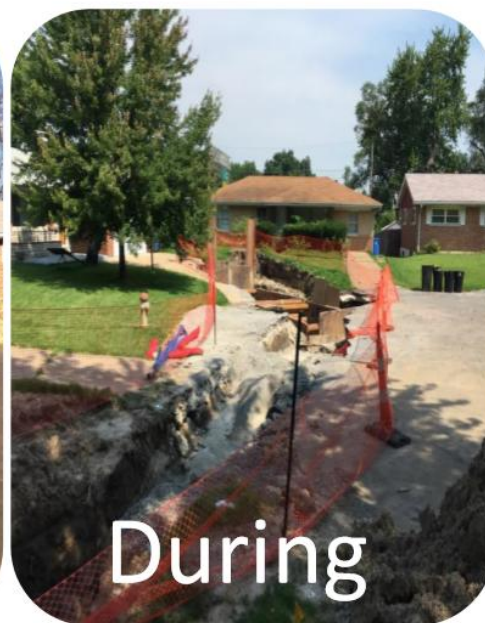

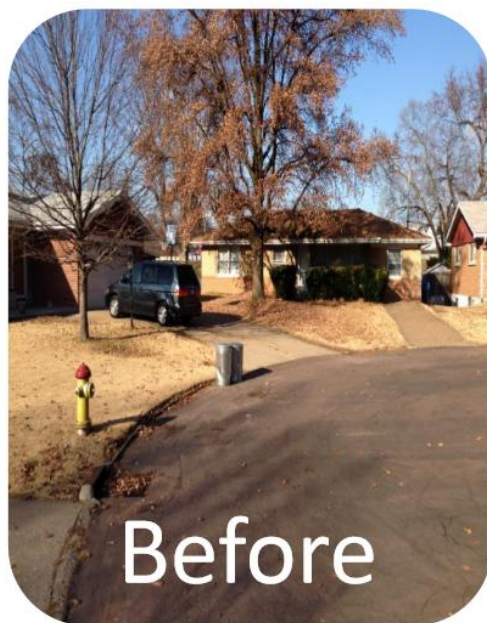

- Design completion: Summer 2026
- Easement acquisition completion: Spring 2028
- Estimated construction start: Fall 2028
- Estimated duration: 36 months

What can residents expect?

- Trenches or “open-cut” excavation
- Tunneling
- Construction noise during normal business hours
- Traffic control plan and access issues
 - Lane and road closures will temporarily affect traffic
 - Temporary access restrictions to residential properties
 - Contractor will notify property owners before access restrictions

What can residents expect after construction?

- Trenches backfilled soon after pipe is installed
 - Roadway and sidewalk restoration
- Private property restoration per easement

Frequently Asked Questions

- Will this work disrupt sewer or other utility services?
- Will trees be removed as part of this project?
- Will construction affect access to my driveway?
- Will emergency vehicles have access to my property during construction?
