Project Overview

■ General Goal

- Increase the capacity of the wastewater sewer in this area
- Reduce basement backups
- Reduce wastewater overflows

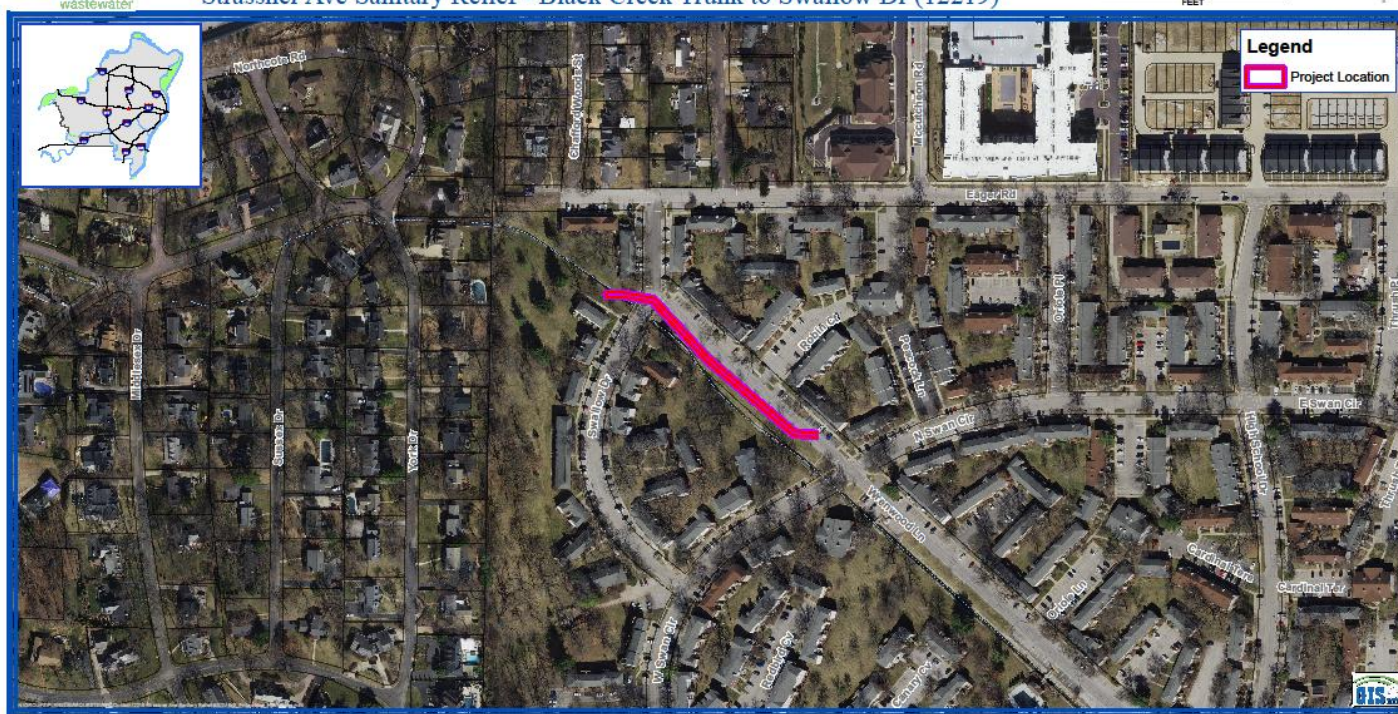

■ Project Scope

- Construct approximately 1,200 feet of wastewater pipe
- Increase pipe size to 12-60"

■ Benefits

- Fewer basement backups
- Eliminate 2 sanitary sewer overflows (SSOs)
- Cleaner waterways

The Metropolitan St. Louis Sewer District
Strassner Ave Sanitary Relief - Black Creek Trunk to Swallow Dr (12219)

Project Map

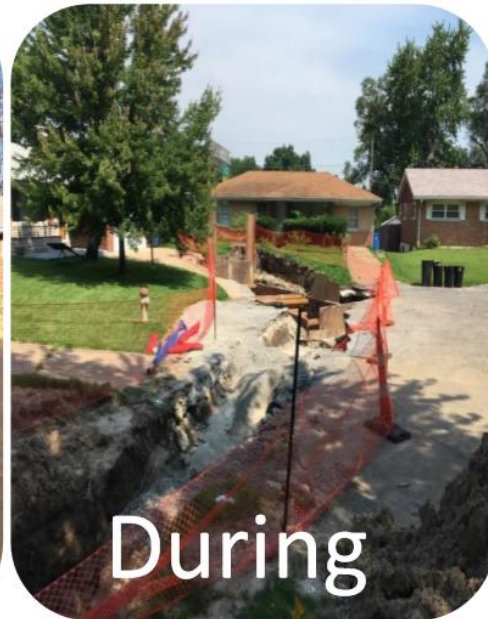

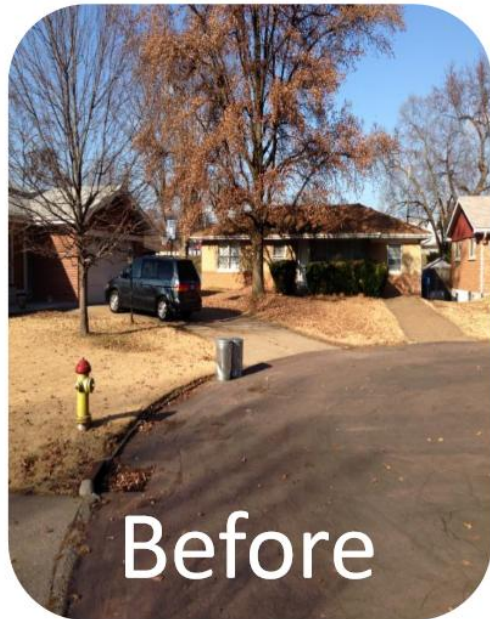

- Design completion: Fall 2026
- Easement acquisition completion: Fall 2026
- Estimated construction start: Summer 2027
- Estimated duration: 12 months

What can residents expect?

- Trenches or “open-cut” excavation
- Construction noise during normal business hours
 - Bypass pumping will run continuously
- Traffic control plan and access issues
 - Lane and road closures will temporarily affect traffic
 - Temporary access restrictions to residential properties
 - Contractor will notify property owners before access restrictions

What can residents expect after construction?

- Trenches backfilled soon after pipe is installed
 - Roadway and sidewalk restoration
- Private property restoration per easement

Frequently Asked Questions

- Will this work disrupt sewer or other utility services?
- Will trees be removed as part of this project?
- Will construction affect access to my driveway?
- Will emergency vehicles have access to my property during construction?
